Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 5, 6 and 7 are rejected under 35 U.S.C. 102(b) as being anticipated by US 4,368,765 to Larkin et al.

Larkin shows a flexible bag 10 for fluent material with integrally formed hanger 25 as seen in Figs. 1-7, the bag is formed with flexible material 13 and 14 enclosing a volume and plural nipples 17 and 20 on the opposite end of the hanger. The nipples are integrally formed with the bag as described in column 3, lines 29-30.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 2, 3 and 4 are rejected under 35 U.S.C. 103(a) as being unpatentable over US 4,368,765 to Larkin et al. in view of US 3,768,704 to Beguin.

Larkin shows all claimed features as discussed above except for the nipples formed with tubular shape and of the flexible material as one piece with the body. Beguin shows a fluid dispenser with a tube shape nipple 25 formed as one piece with the body 12. It would have been

obvious to a person with ordinary skill in the art at the time the invention was made to modify the device of Larkin to use a nipple made with the same flexible material as the bag as taught by Beguin to better seal the nipple during use, see column 4, lines 44-53.

5. Claims 8, 9 and 10 are rejected under 35 U.S.C. 103(a) as being unpatentable over US 4,368,765 to Larkin et al. in view of GB 2 255 073 to Dollimore.

Larkin shows all claimed features as discussed above except for a squeezing apparatus used to dispense plural materials from the bag. Dollimore shows a roller 17 pressing on multiple bags 9 and 11 to dispense plural materials. It would have been obvious to a person with ordinary skill in the art at the time the invention was made to use the device of Larking in a squeezing apparatus to dispense multiple materials as taught by Dollimore and maintain reactant materials separated until ready to be used.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Kirkland shows a flexible collapsible container. Van Dijk shows a device for dosing powder. Hewett shows a material dispenser. Shah shows an infusion apparatus.
